Profile

Enthusiastic CSE (AI) student with a keen interest in technology and innovation. Experienced in leadership roles as NSS Team Leader and Class Monitor, with strong communication and teamwork skills. Passionate about learning new technologies and solving real-world problems through hackathons.

Education

Bachelor of Technology (B.Tech) — CSE AI, 1st Year

Pursuing

University of Lucknow

Intermediate

Passed with 91%

High School

Passed with 90.5%

Experience

National Service Scheme (NSS) Team Leader

2026

- Led a team of volunteers in social service activities.
- Organised community events like cleanliness drives and awareness campaigns.
- Managed team coordination and task distribution.

Class Monitor

2022 – 2024

- Managed classroom discipline and coordination between students and teachers.
- Acted as a communication link between faculty and students.

Projects

AI-Powered Citizen Grievance System

Python · NLP · PostgreSQL · Redis · Twilio · System Design

- Designed a 4-layer AI-driven grievance redressal platform enabling citizens to submit complaints via Web Portal, WhatsApp/SMS, Voice/IVR, and Social Media.
- Built an **AI Processing Core** with NLP for language detection, Sentiment Analysis for urgency scoring, and an Auto-routing Engine for department tagging.
- Implemented a **Duplicate Detector** and **Auto-Responder** to cluster similar issues and send acknowledgments with estimated resolution times.
- Designed an **Analytics Dashboard** with Geo Heatmap and SLA tracking, and a **Governance Output layer** generating weekly AI reports and escalation alerts.

Personal Productivity Dashboard & Goal Tracker

HTML5 · CSS3 · JavaScript · LocalStorage · GitHub Pages

- Deployed a GitHub-style **Activity Heatmap** for daily consistency tracking and productivity streak visualization.
- Built a **Zen Focus Mode** with glassmorphism UI and focus-blur effect to minimize distractions during deep work sessions.
- Developed a task management system with custom tags (Coding, College, Personal) and real-time status badges.
- Integrated **Canvas Confetti** and audio feedback for goal completion with adaptive dark/light mode toggle and LocalStorage persistence.

- Built a **LangGraph multi-agent framework** (Router, Compliance, Negotiator agents) for intelligent freight routing and real-time spot-rate bidding.
- Implemented a **Reflexion self-correcting loop** to run pre-execution simulations, catching weight and address issues before shipment.
- Deployed **Computer Vision pipelines** for automated warehouse damage detection and claims filing, with dynamic freight re-routing on exceptions.
- Developed an **OCR-driven compliance sub-agent** to audit invoices against global trade laws, auto-flagging dual-use goods and tax mismatches.
- Structured a **Confidence Score system** that auto-executes tasks above 95% confidence and escalates edge cases with logged reasoning.

Technical Skills

Languages	C Programming, Python
Frontend	HTML , CSS
Design Tools	Figma , Canva
Version Control	Git , Github
Soft Skills	Communication, Leadership, Team Coordination, Problem Solving
